

ES-View Mobile Surveillance Client App

Overview

Available on Android and iOS, ES-View is a free app that directly connects Uniview surveillance products through network, offering a new way of watching live and recorded videos, controlling PTZ, receiving alarms and managing cloud devices on mobile platforms.

Key Features

- Safe: data encryption, cell phone/e-mail registration, pin/gesture password and real-time alarm notification
- Stable: add/manage/delete cloud devices, Clear/Balanced/Smooth switch and multi-layer network address translation (NAT) traversal
- Handy: quick add devices by scanning QR code, tap-to-drag live videos, gesture PTZ control and cellular/Wi-Fi data statistics
